As a leading provider of recruitment software, Swiftpro has the industry knowledge, technical expertise and foresight to help you realise your business goals, fully utilise your available resources, and increase productivity.

Overview

Swiftpro Visual CVPlus is a complete recruitment software solution designed to streamline and automate recruitment business processes. It is a powerful, easy-to-use system, to guide and help consultants at every stage of their task.

Global Access

Access to your database from client site or an 'away' location is often essential in today's active, dynamic business climate. With its advanced features, CVPlus has the capabilities for multi branch businesses with overseas offices to single site companies. Internet connections empower remote users to connect to a central head office. This infrastructure can be extended to include a network of global offices at worldwide locations.

This leading edge technology, often referred to as thin client, offers all the benefits of reduced desktop administration and a secure controlled environment. Your data remains secure and protected at Head Office, and your consultants and remote offices access company data via a high performance broadband connection.

Recent improvements in the availability, reliability and cost of broadband connections can be used to deliver this technically advanced solution to your business.

Flexible, User Friendly Software

Fully searchable modules deliver smooth performance, creating lists for hot jobs within seconds. Users can now view on a single screen the entire recruitment cycle in relation to for example, an open job or a chosen applicant. Information displays include for any applicant, a CV on screen, list of interviews, with dates and status, and a list of contact calls. Another preferred display includes an open job, list of CVs sent, interviews arranged and contact notes with the client. Consultants can view the complete activities for a job assignment or an Applicant's progress to date at any time.

Complete Solution

Swiftpro expertise is directed at helping recruiters to excel in their activities and produce excellent results using CVPlus high performance software. While you direct all your efforts to finding and placing the best talents, we direct ours to providing the best systems to make this process smooth, efficient and professional.

Training

In order to enjoy the full functionality of CVPlus and maximise return on investment, clients benefit from Swiftpro training programmes. Swiftpro offers training courses for all job roles and for all levels of computer skills, from the beginner to the expert. Courses are designed to be practical – we focus on the implementation and use of CVPlus software for all the day-to-day tasks of business recruiters.

Technical support

After sales customer support is a major part of our “complete solution” and a cornerstone of the relationship with every client. Our goal is to support every client and help with the smooth running of your CVPlus system. As part of this plan we manage all details from installation and training to on-going support. We guide our clients step-by-step, aiming to provide effective support and ultimately – a high level of customer satisfaction.

Our technical teams provide a comprehensive range of services to assist clients with both product and technical questions. Whether your query relates to basic system functionality or advanced features, our highly trained technical staff are equipped with the expertise and knowledge to help you.

Clients request Technical Support in the following ways: Telephone Support or Email: Direct line to Trained technical staff, Remote Access: Swiftpro connects online to your system, On-site: A trained technician is supplied on site.

Development

Swiftpro continues to invest in research and development while carefully monitoring trends in recruitment and advances in technology, so benefits and efficiencies can be passed on to our clients. We highly value your comments and suggestions and implement approved changes and enhancements in our product updates and new releases.
