

Delivering Real Benefits to Your Business

Overview

Swiftpro CVPlus is a comprehensive recruitment solution designed to streamline and automate the entire business process of recruitment consultancies. It is a powerful, easy-to-use system, to guide and help consultants at every stage of their work.

Global Access

Access to your database from client site, or an 'away' location is often essential in today's active, dynamic business climate. With its advanced features, CVPlus is designed for single site offices to multi branch businesses with overseas offices. Internet connections empower remote users to connect to a central UK head office. This infrastructure can be extended to include offices throughout the UK and indeed - overseas branches.

This leading edge technology, often referred to as thin client, offers all the benefits of reduced desktop administration and a secure controlled environment. Your data remains secure and protected at Head office, and your consultants and remote offices access company data via a high performance broadband connection.

Recent improvements in the availability, reliability and cost of broadband connections can be used to deliver this technically advanced solution to your business.

Flexible, User Friendly Software

Fully searchable modules deliver smooth performance, creating lists for hot jobs within seconds. Users can now view on a single screen the entire recruitment cycle in relation to for example, an open vacancy or a chosen applicant. Information displays can include for any applicant, a CV on screen, list of interviews, with dates and status, and the history of contact calls. Another preferred display includes an open vacancy, list of CVs sent, interviews arranged and contact notes with the client. A consultant can view the complete activities for a job assignment or an Applicant's progress to date at any time.

Complete Solution

Our expertise at Swiftpro Recruitment Solutions is directed at helping recruiters to excel in their activities using CVPlus high performance software. While you direct all your efforts at finding and placing the best talents, we direct ours at providing the best systems to make this process smooth, expedient, and efficient.

Training

In order to enjoy the full functionality of CVPlus, clients can benefit from the Swiftpro training system. Swiftpro offers training courses for all job roles and for all levels of computer skills, from the beginner to the expert. Courses are designed to be practical - we focus on the implementation and use of CVPlus software for all the daily tasks of the business recruiter.

Technical support

After sales customer support is a major part of our "complete solution" and a cornerstone of the relationship with every client. We are committed to keeping each and every CVPlus system running smoothly, by handling all details from installation and training to on-going support. We guide our clients step-by-step, aiming to provide effective support and ultimately – a high level of customer satisfaction.

Our technical team provides a comprehensive range of services to assist clients with both product and technical questions. Whether your query relates to basic system functionality or advanced features, our highly trained technical staff are equipped with the expertise and knowledge to help you.

Support is provided the following ways:
Telephone Support: Direct line to Trained technical staff
Remote Access: Swiftpro connects remotely to your system
On-site: A trained technician is supplied on site

Development

Swiftpro continues to invest in research and development while carefully monitoring trends in recruitment and advances in technology, so benefits and efficiencies can be passed on to our clients. We highly value your comments and suggestions and implement approved changes and enhancements in our product updates and new releases.
